

LEARN HOW TO MANAGE YOUR SCHOOL'S RESOURCES EFFECTIVELY WITH FREE ONLINE TRAINING

During these uncertain times, it's never been more important to focus on financial efficiency and sustainability.

Between December 2020 and March 2021, [Entrust Support Services](#) delivered six webinars on behalf of the Department for Education (DfE), to help schools to achieve their teaching and learning ambitions with the money that's available to them.

There are no further live training sessions planned, but schools can watch on-demand recordings of the webinars for free.

THE WEBINARS

The webinars help schools to integrate their curriculum goals and financial resource management into one approach - providing them with a holistic and proactive way of planning and using their resources efficiently, and of ensuring that the leadership team makes decisions collaboratively.

They give schools the knowledge and tools that they need to quantify areas of inefficiency, diagnose the causes and then make informed decisions to manage their resources effectively.

THE WEBINARS COVER:

Introduction to Benchmarking

This webinar introduces you to and outlines the benefits of benchmarking, and walks you through the DfE's benchmarking website and other free DfE tools. It also gives you best practice tips, including what makes a good comparison school and what to do with the information once it's been derived.

Integrated Curriculum and Financial Planning Using DfE Tools

This webinar covers the free tools that are available on the DfE website. These include the primary and secondary school Integrated curriculum and financial planning (ICFP) workbook and the School Resource Management tool. You explore how to use them to introduce ICFP in your school.

Integrated Curriculum and Financial Planning Metrics Deep Dive

This webinar reviews the key metrics identified in the Integrated Curriculum and Financial Planning Using DfE Tools webinar, before introducing additional metrics. It outlines what these metrics mean and how you can calculate them. Finally, you find out how you can use these insights to provide practical benefits.

Introduction to Procurement

This webinar helps you to develop your understanding of the procurement cycle, getting best value from a contract and related financial regulations. We explore how you can mitigate the risks of fraud, theft, bribery, corruption and loss.

Joined-up Leadership for Effective School Resource Management

This webinar defines the roles and responsibilities of key personnel, how they should integrate and collaborate, and the problems that can arise if school business professionals aren't fully integrated with the senior leadership team.

Integrated Curriculum and Financial Planning During Times of Uncertainty

This webinar explores the impact that times of uncertainty, such as the Coronavirus pandemic, can have on income, staff absences and class sizes. We explore why having an ICFP structure in place can assist you in quickly working out the effects of the changes.

WHO ARE THE WEBINARS FOR?

The training is designed for school business professionals, senior leadership teams, curriculum leads and governors. It's available to all schools and trust staff across England.
